

# OHIO

## Results from Clinical Arm of AYA-BH CoIN

### Demographics

**1** PRACTICE

- Viking School Based Health Center

**70** PATIENT VISITS REVIEWED

**59%** female  
**41%** male

Age	% of Visits
12-17	94%
18-25	3%

### Racial Distribution

**59%** well-care visits  
**41%** other visits

**90%** in-person  
**10%** telehealth

### Depression Screening

#### Screening Increased

Most common screening tool  
**PHQ**  
100% of screens

**63%** of youth screened were **positive** for depression

### Follow-up Plans

**88%** of youth who screened **positive** for depression had a follow-up plan

**89%** of youth with a plan included in-office follow-up

Proportion of youth that attended their follow-up visit increased

**56% → 100%**

Depressed patients with in-office follow-up only

**4%** of youth with a plan were referred out of practice

**3%** of patients declined services

### Collaboration

#### Mental Health Professionals

Mental health and primary care are co-located and function as one integrated system

#### Community Programs

Would like to develop relationships with mentoring programs to support youth with depression

### Practice Changes

- Began universal depression screening starting at age 12 using the Patient Health Questionnaire
- Scheduled a date with youth to follow-up internally after a positive depression screen
- Explored other opportunities to follow-up with patients who screen positive for depression

### Practices' Needs

- Posters, handouts, brochures, and social media content that promote the importance of an annual well visit that includes mental health assessment

- Up-to-date list of mental health providers, family and peer support programs, youth recreation and mentor programs

- Tools to gather feedback from youth and families on quality of care

- Convene primary care, school, and community providers to promote collaboration in caring for youth with depression

- Establish mechanisms for on-going collaboration between public health and primary care to address youth mental health

Prepared by the National Improvement Partnership Network (NIPN) for the Ohio Title V participants in the Adolescent and Young Adult Behavioral Health CoIN (AYA-BH CoIN).
